| Session | Poster No. | Name | Affiliation | Title |
|---|---|---|---|---|
| 1 | 1 | Vasudevan Thangaraji | National Tsing Hua University | Quinolinylmethanone-Based Thermally Activated Delayed Fluorescence Emitters and the Application in OLEDs: Effect of Intramolecular H-Bonding |
| | 2 | Takuya Tominaga | Osaka Prefecture University | Synthesis of New Thermally-activated Delayed Fluorescence Materials Having Arylsulfonyl Groups |
| | 3 | Chan Hee Lee | Dongguk University | Effective TADF Emitters with Asymmetric Molecular Structure |
| | 4 | Guoyun Meng | Beijing Institute of Technology | Isomeric Bright Sky-Blue TADF Emitters Based on Bisacridine Decorated DBNA: Impact of Donor Locations on Luminescent and Electroluminescent Properties |
| | 5 | Chin-Yiu Chan | Kyushu University | High-Performance and Stable Sky-Blue Delayed Fluorescence Organic Light-Emitting Diodes |
| | 6 | Shin Hyung Choi | Dongguk University | High-Performance TADF-OLEDs with Ortho-substituted Pyridinecarbonitrile Derivatives |
| | 7 | Yanqiong Zheng | Shanghai University | Performance Improvement of Fluorescent and TADF OLEDs by Manipulating the Charge Transport Balance |
| | 8 | Xiaozeng Song | Tsinghua University | Understanding and Manipulating the Interplay of Wide-Energy-Gap Host and TADF Sensitizer in High-Performance Fluorescence OLEDs |
| | 9 | Haripriya V K | Indian Institute of Technology, Madras | Polaron Induced Exciton Dissociation in Organic Semiconductor Devices |
| | 10 | Masaki Tanaka | Kyushu University | Analysis of TADF-OLED Characteristics Based on External Magnetic Field Effect |
| | 11 | Zugang Liu | China Jiliang University | Quantum Dots Light Emitting Diodes with TADF |
| 2 | 1 | Yafei Wang | Changzhou University | Solution-Processed Highly Efficient Bluish-Green Thermally Activated Delayed Fluorescence Emitter Bearing Asymmetric Oxadiazole-Difluoroboron Double Acceptor |
| | 2 | Zhongjie Ren | Beijing University of Chemical Technology | Pendant Polymers as Solution-Processable TADF Materials for OLEDs |
| | 3 | Christopher M. Tonge | University of British Columbia | Synthesis of Polymers Exhibiting Thermally Activated Delayed Fluorescence via Room Temperature Cu(0)-RDRP |
| | 4 | Ken Albrecht | Kyushu University | Development of Ink-Jet Printable TADF Dendrimer for OLEDs with Fully Solution-processed Organic-Layers |
| | 5 | Guohua Xie | Wuhan University | TADF Emitters Sensitized Fluorescent Polymer for Transfer-Printing OLEDs |
| | 6 | Manish Kumar | University of Aveiro and Centre for Nanotechnology and Smart Materials | Towards Fully Printed High Efficient Green OLEDs Based on Thermally Activated Delayed Fluorescence |
| | 7 | Sanu Xavier | Indian Institute of Space Science and Technology | Tunable TADF PLED for Digital Data Transfer Applications: A Theoretical Approach |
| | 8 | Toshinori Matsushima | Kyushu University | Thick-Film Organic Light-emitting Diodes with Metal Halide Perovskite Transport Layers |
| | 9 | Petter Lundberg | Umeå University | TADF Based Light-Emitting Electrochemical Cells Make Headway toward Environmentally Green and Efficient Emissive Devices |
| | 10 | Atula S.D. Sandanayaka | Kyushu University | An Electrically-pumped Organic Semiconductor Laser Diode |
| | 11 | Yuxue Feng | China Jiliang University | Solution Processed Green Organic Light Emitting Devices with Soluble Thermally Activated Delayed Fluorescent |
